Skills

- JavaScript | TypeScript | Python | HTML | CSS | SQL | Node.js | Prisma | Express.js | Next.js | Tailwind | React | React-Native
- Azure | Firebase | CI/CD | OOP | Linux | NoSQL | Git | Redis | RabbitMQ | REST | WebSockets | Database Design | Docker
- AWS (EKS, RDS, S3, KMS) | Kubernetes | Helm | Jenkins | PostgreSQL | NestJS | Temporal | Kafka | Debezium | LLM Agents
- Microservices | Distributed Systems | Frontend | Backend | Full-Stack | English, Hindi – *All professional proficiency or above*

Experience

Software Engineer **Quick Dry Cleaning** *Remote* **12/2025 – Present**

- Drove the **Azure → AWS** migration: re-wrapped **184 tenants'** encryption keys onto **KMS**, moved CDC to **Kafka**, cut production over to **EKS**, and sped up **CI/CD** from **36.9 to ~21 min.**
- Built the multi-tenant **PostgreSQL** data layer for **NestJS** services (per-tenant DB routing, **Row-Level Security**, field-level encryption) and an **LRU key cache** removing **~895k** Key Vault calls/mo.
- Engineered a **CDC** reporting pipeline (**Postgres → Debezium**) with per-store-day payment reconciliation, powering live sales dashboards.
- Built the real-time POS client for **James**, an **LLM voice agent** taking counter orders (**Centrifugo WebSockets**, **ElevenLabs STT**), and worked on **Joy**, an AI phone agent on **Twilio/LiveKit SIP**.
- Implemented **i18n** and **RTL (Arabic)** support across a legacy **ASP.NET WebForms** platform: per-page **JSON** locales (en/ar/fr/hi), localized dates/currency, and PDF/Excel exports.

Full Stack Developer **Neusort** *Remote* **09/2023 – 11/2025**

- Developed company website using **Next.js** for product showcase and lead generation, **boosting leads by 40%.**
- Implemented CI/CD pipelines using **GitHub Actions** and **Azure** for automated testing, building, and deployment processes.
- Integrated **RabbitMQ** for job queues and **Redis** caching, cutting session **load times by 60%.**
- Built slot-booking service, managing hourly interview capacity limits across global timezones with real-time availability tracking and conflict resolution algorithms.
- Developed custom load balancer with intelligent traffic distribution and **Azure Functions** cron-jobs for automated VM provisioning/deprovisioning based on real-time demand metrics **ensuring 99.9% availability.**
- Created EvalAI platform - AI coding agent for collaborative problem-solving interviews. Integrated **BAML** for structured LLM outputs to ensure consistent response formatting, **guaranteeing 100% compliance** with the given output format.
- Built real-time media server capturing WebRTC peer connections, processing video streams **(cutting CPU utilization from 70% to 20%),** storing in **Azure Blob Storage**.
- Integrated **Razorpay** payment system with webhook handlers using **Node.js** for transaction verification and processing.

Software Developer Intern **Hyrr** *Remote* **03/2023 – 08/2023**

- Built gamified assessment app with 10 interactive cognitive games using **React-Native** for candidate evaluation.
- Integrated **Firebase** auth and real-time database enabling seamless user management and instant data synchronization.
- Enhanced user engagement through custom SVG animations and smooth interactive experiences within mobile application, **boosting retention by 45%.**

Education

Bachelor of Technology **Rajiv Gandhi Govt. Engg. College** *Himachal Pradesh, IN* **2019 - 2023**

- Electronics and Communication Engineering (ECE)

Projects

Sutra-CLI

- CLI for AI agent orchestration, automating multi-project code evolution via LLM-powered planning/sub-agent execution.
